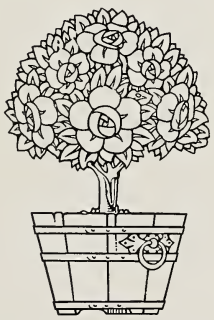
GROWN AND FOR SALE BY

BEVERLY HILLS NURSERIES

BEVERLY HILLS, CAL.

LOS ANGELES COUNTY



RODEO LAND AND WATER CO., OWNER

NO. 1130 I. N. VAN NUYS BUILDING

LOS ANGELES, CALIFORNIA

Nurseries situated about fourteen miles from the City of Los Angeles. Take Pacific Electric cars marked, "Beverly Hills" or "Coldwater Canon," at Hill Street Station, between Fourth and Fifth Streets; or anywhere on Hill Street; or, motor out Wilshire Boulevard to Beverly Drive, then north to Beverly Hills Hotel, then east one-half mile to Nurseries; or, from Pasadena, Monrovia, and that district, through Annandale, Eagle Rock, Glendale and Hollywood, direct to Nurseries.

A Word to Patrons and the Public:

THE BEVERLY HILLS NURSERIES have been established for a number of years, and have become very favorably known throughout the State of California. Our business heretofore has been chiefly wholesale, although we have secured a fair share of the retail trade, as well. With a view, however, to increasing our retail trade, and in response to a general demand, we are sending out this little booklet containing prices and brief descriptions of some of the stock carried in our nurseries. This is not to be considered a catalogue, in the fullest sense of the word, but merely an amplified price list. It is our purpose to issue an exhaustive catalogue, later in the season, which, we trust, will do full justice to our nurseries and the large stock of rare ornamental trees and shrubs, roses, and deciduous and citrus fruit trees which we carry at all times.

All orders placed with us are handled by men who are versed in the nursery business,—who have made it a life study, thus assuring efficient service, and reducing to a minimum the possibility of errors.

With every sale, large or small, we exercise all due care and caution in the labeling of stock, and are ready at all times, on proper proof, to replace any stock that may not be true to name, or to refund the amount paid therefor, but in no case will we be held liable for a greater sum than the original purchase price.

DELIVERIES. We make deliveries in Los Angeles, Pasadena, Santa Monica and intermediate points. In purchases of light weight for other points, it is always best to ship by express; heavy stock should, of course, be shipped by freight. All packing is done as lightly as possible, and complies with the Inter-State Commerce law, and only the actual cost thereof is charged to the purchaser.

SUBSTITUTION. This is a practice we do not follow unless authorized by the purchaser, as we believe it to be, as a rule, very unsatisfactory. In the event that we are unable to fill an order for a specified plant or variety, we advise the customer, and suggest the best substitute.

HOW TO ORDER. Orders should be written on a separate sheet of paper, and it should be stated how shipments are to be made,—whether by freight or express, and the route designated; otherwise, we shall use our own discretion in forwarding. After deliveries are made to the carriers, we are not responsible for any damage which may occur to the stock during shipment. We are ready, however, at all times, to assist purchasers in recovering any loss which may occur during shipment. All claims for mistakes in filling orders must be made within ten days of receipt of goods.

TERMS. Parties unknown to us should accompany their orders with cash, or furnish satisfactory references; no stock is shipped C. O. D. Remittances should be made by Post Office or Express Money Order, or Bank Draft, to the Rodeo Land & Water Company, 1130 I. N. Van Nuys Building, Los Angeles, California.

LANDSCAPE DEPARTMENT. We are prepared at all times to furnish plans and estimates for the laying out of large estates or small grounds, or for the remodeling of old ones. Our staff for this work is composed of men of long experience and proven ability.

We desire to thank those who have favored us with their patronage in the past, and beg a continuance of their favors, and we take this opportunity also to extend to strangers a cordial invitation to visit our nurseries and inspect our large stock of ornamental trees and shrubs, which we feel is a credit to any community. A very interesting and profitable hour could be spent in the beautiful parks about BEVERLY HILLS (recognized as one of the most magnificent subdivisions in this country, and as an ideal place for a home site), all of which have drawn on our nurseries for their entire supply of trees and shrubbery.

BEVERLY HILLS NURSERIES.
